

HOME FIRE SPRINKLERS

FIRE IS FAST SPRINKLERS ARE FASTER

A home fire sprinkler can control a fire in 1.5 minutes or less.

Home fire sprinklers detect a fire and put water on it quickly, slowing the fire or even putting it out. That gives you and your family time to escape a fire safely.

With fire sprinklers

- Sprinkler closest to the fire activates.
- Water controls the fire, heat and smoke.
- Residents have time to safely escape.
- Damage is limited.

Without home fire sprinklers

- Flames keep growing.
- Flames, heat and gases spread.
- Flashover can occur. Everything catches fire.
- The fire becomes deadly.
